

We Can Print On It!

With our high-resolution flatbed UV printer, we can print at photographic quality directly onto rigid material up to 8' x 4' x nearly 2" thick — from Plexiglas, tempered glass, metal, fluted board, and all types of plastics... to odd items such as acoustic ceiling tiles, wood, and even an entire panel door edge to edge.

Call us today to learn more about this amazing technology!

Imaging directly onto wood while preserving the wood grain texture.

Printing directly onto a door, even contouring into the beveled panels.

Printing directly onto clear acrylic panels for a conference room wall.

Imaging directly onto ceiling tiles, maintaining their acoustical properties.
